

I have already registered my number (301) 515-9398 to the DoNotCall list. My comment is that everyday I receive phone calls from the number 866-245-6209 (telemarketing) which has a recording. I have been trying to call this number to eliminate my phone # from the list. Unfortunately I have no success. Once I call their number they have an automated system indicating if you want to be placed on the donotcall list, however you have no options because the mail box is full and if you wait on-line no one responds. This is very annoying and disappointed.

I would like a stop to this matter. I have lost track of the times I have received calls from this number.

Thanks for any help that you can provide.
